Kelly –

By all indications, no power issues last night. Both ponds 16S and 18A are on the same power feed. Auto dialer did not call out. GES units were running on fresh air this morning – if there had been a power outage, the blowers don't re-start themselves when power is restored. PLC at GETS didn't register power blip. One of our contractors drove by at 9:30P and saw lights at the GETS; lights at GES not readily visible from road.

Was wondering if the power was off at the RCRA Ponds tonight? No lights at any of the areas that could be seen. Let me know if I missed something.

Thanks
Kelly

Greg,

As you had directed, FMC is providing a weekly report, pursuant to the RCRA Pond UAO, describing field activities conducted pursuant to work plans you have approved.

Work Performed this week

- Continued implementation of the IWP and 7 day operation (80 hours per week; 12 hr/day Mon-Sat and 8 hrs on Sunday) of one GES unit at the east perimeter standpipe on Pond 18A, and operation of a second GES unit extracting at that location 4 hrs per day, 7 days per week that began operation on 2/6/14 pursuant to EPA approval. The relatively flat concentration trend continued and alternative GES operating scenarios will be evaluated if the trend changes.
- Continued continuous monitoring at three Pond 18A boundary locations during periods of gas extraction. There were no TWA or maximum values above the thresholds specified in the Air Monitoring Plan. A spreadsheet summarizing the results of this monitoring to date is attached.
- Other than continuous monitoring at Pond 18A, no monitoring was required pursuant to the approved work plans during the reporting period.

Problems Encountered:

None.

Unplanned Events Encountered:

None.

Work to be performed the following week:

- Continue implementation of the IWP and 80 hours per week operation of one GES unit and 28 hours per week of operation of a second GES unit, at the east perimeter standpipe on Pond 18A.
- Continue continuous monitoring at three Pond 18A boundary locations during periods of gas extraction.
- Other than continuous monitoring at Pond 18A, no monitoring is required to be performed pursuant to the approved work plans.
- Begin to compile March monitoring data for submittal in the monthly report to be submitted 4/9/14 and reviewed in a conference call scheduled for 4/14/14, 9A PST/10A MST/noon EST.
